SUMMER UNIVERSITY ON MONUMENT PROTECTION

(48th EGER SUMMER UNIVERSITY ON MONUMENT PROTECTION)

EUROPEAN HERITAGE AND HERITAGE' TOURISM - TASKS AND CHALLENGES

21 JUNE – 27 JUNE 2018

EGER

ICOMOS Hungarian National Committee has regarded its **most important task to contribute to the further education and dissemination of the up-to-date knowledge for professionals dealing with protected monuments.** In the realization of the above mentioned objective, **the András Román Summer University on Monument Protection** is an important, widely recognized professional further education and international forum in Hungary and abroad as well. In 2018 it will be the 48th course of it

The theme is different in each year, and current of the present days. In this year we are going to join to the campaign of European Union "European Cultural Heritage Year". The title of the Summer Course is:

EUROPEAN HERITAGE AND "HERITAGE TOURISM" –TASKS AND CHALLENGES

The "heritage tourism" beside its cultural meaning, has important economic, employment factor, has European, regional and local peculiarity, can strengthen local identity as well. To take positive advantage to this phenomenon it needs well educated co-operating professionals. The summer university course as an international professional forum by means of its education programme, within the given topic, is going to provide theory based information and practical advises for the participants.

The many figured complex and sophisticated tasks of heritage preservation will be analysed on the basis of changing - economic and social – demands of the society and on the newest Hungarian and international research results and various issues of practice. Our aim is to demonstrate the manifold tasks, and examine the scientific and technical background of the efficient restoration with the wide range of scientific and practical results..

We would like to reveal the consequences of the changing demands and challenges, as the methods of co-operation between the parties involved. Understanding the problems and the adequate practical solutions will be helped by series of Hungarian and foreign case studies. The subjects will be embedded in historical and social milieu. The comprehensive, professional restoration, the well maintained original-, or the well-defined new function, sustainability and the new demands will presented by excellent Hungarian and foreign lecturers.

The duration of each lecture is 40-45 minutes. The participant can get acquainted with the details of the given subject's details by recent knowledge enlightened it from different point of view

- **the participants will be helped in the solution of their everyday tasks, by theoretical and comprehensive presentations, beside series of case studies.**
- **discussions, forum-like programmes, workshops and site visits (guided by authorized professionals) going to contribute the understanding all of the information**
- **the traditional and very successful Students' Forum, will give possibility for the students to give account of the results of their own work and experience, beside it helps the international exchange of professional results**
- **traditional one-day study tour to the region and the half-day visit to the historic city of Eger, provide possibilities for the participants to get acquainted with, and draw the lessons of the visited cases, by the help of professionals concerned.**
- **the lecturers are representatives of prestigious universities and institutions from all around Europe and representatives of ICOMOS**
- **participants represent almost all fields of monument protection**

The education, as it has been during the almost five decades of its history, give **direct professional support for those working on research, restoration, or in the other field of protection and preservation of monuments, as for those, who work on continuous maintenance and repair.** The programme will serve these purposes in 2018 as well.

In the field of historic monument protection the summer university is an exceptional opportunity for further and life-long education, acknowledged in Hungary and abroad, too, which intends to throw light upon the possibilities for solutions and upon the scope of action of decision makers, professionals, owners, local governments and also committed civilians. As students of this further education we can regularly greet professionals from different countries of Europe, and also from other continents, from South America to Africa, or from Japan to India. It is an additional merit of this event to invite professionals dealing with heritage protection as such, from neighbouring countries, and also who dealing with Hungarian heritage.

The summer course is acknowledged as an accredited training in Hungary and some foreign countries as well. It is approved by Budapest Technical University. The participants were awarded 9 credit points in the optional category by the accreditation committee of the Chamber of Hungarian Architects in 2017.

Simultaneous translation in English is provided all through the period of the international summer course. The file of presentation and the illustrations are archived in order to make a bilingual multimedia publication. The already released publications have ISSN and ISBN number in the register of the National Széchenyi Library, and can also be found on the website of the summer university.
